

Alaeddine Cheniour

Education

TU Dortmund & Lamaar Institut July 2026 //Dortmund, Germany

Summer School in AutoML covering introductory, state-of-the-art, and application lectures for AutoML and Foundation Models. Included Core topics such as: Hyperparameter optimization and model selection, Applying and scaling foundation models, Neural architecture search, Bayesian Optimization, ...

Institut Polytechnique De Paris 2025 – 2026 //Palaiseau, France

Master of Science in Interaction, Computer Graphics & Design. Courses include : Computer vision, Deep learning, Computer animation and simulation, data physicalization & visualisation, Quant UX. Placed 6th out of 87 in a Kaggle challenge to predict twitter users social roles.

Polytech Paris Saclay 2023 – 2026 //Orsay, France

Engineering Degree in Mathematics and Computer Science. Courses include : advanced database management, advanced computer networks, advanced C++, OOP, web development, machine learning, computer architecture, optimisation. (1st year: 16.8, 2nd year: 16.78). Won the Polytech Rendering Competition 2023.

University of Paris City 2020–2023 //Paris, France

2022–2023: 2nd year Bachelor of Science double majoring in Mathematics and Computer Science. Grade: 17.7 , Rank: 3/50.

2020–2022: 1st and 2nd year Bachelor in Computer science (Grade: 16.4 , Rank: 4/107).

Relevant Experience

Medical Research Intern @Dassault Systèmes

Feb – Aug 2026 //Vélizy, France

- Evaluating current state-of-the-art techniques in 3D manipulation and volume rendering Techniques.
- Building high-performance 2D/3D manipulation, annotation and segmentation tools for volumetric medical data.
- Implemented a real-time volumetric segmentation pipeline to isolate anatomical structures and filter out scanning artifacts.
- Investigating remote rendering pipelines for large-scale medical datasets, utilizing server-side rendering acceleration to enable low-latency 3D visualization.

Full-Stack Software Engineer @Ouidou

April – Aug 2025 //Paris, France

- Optimized application performance by identifying and resolving bottlenecks in the backend, database queries, and frontend rendering.

Academic Tutor @Polytech Paris Saclay

Sept 2024 – Jun 2025 //Orsay, France

- Animated tutoring sessions for first and second year Polytech Paris Saclay Students in Computer Science, Mathematics and Physics.

Software Engineer Intern @SMA BTP

Jun – Aug 2024 //Paris, France

- Automated file submission tasks and application testing by implementing Selenium scripts And interfaced with other developers to ensure coherent user experiences.

Data Analyst Intern @SEABEX

July – Aug 2022 //Orléans, France

- Wrote and maintained Python programs for the analysis and processing of satellite data.

Skills

Programming Languages

JavaScript, TypeScript, HTML, CSS, Python, PHP, Java, C++, OCaml.

Libraries & Frameworks

React, Angular, Node.js, Vue, OpenGL, Qt, Spring Boot, Pytorch, OpenCV, Selenium, THREE.js, Vtk, Cornerstone.

Tools & Platforms

Git, Wordpress, Docker, Unity, Godot, Figma.

Interests

Street Photography, Swimming, Reading.

Languages

English(C1: 980/990 TOEIC), German(B1), French(C1), Arabic(Native).

Selected Projects

-Computer Vision Chess reconstruction: developed a computer vision system to identify the positions of pieces on the chessboard and reconstruct the game situation from a photo at any given angle. [Z](#)

-Cursor-Tracking HeatMap: Developed a Google Chrome extension that captures tester cursor behavior during live sessions to visualize user interactions in order to generate heatmaps and detailed user paths, providing actionable insights.[Z](#)

- Unsupervised & Self-Supervised Image Classification: Developed an AI pipeline to categorize food images using mostly unlabeled data.[Z](#)
